Quick download instructions of the free version of

MiraMon

Professional, desktop version for Windows

Download from this link:

https://www.miramon.cat/mus/eng/index.htm

The **complete** downloaded ZIP (~712 Mbyte), contains the entire program. With a connection of 600 Mbps the process takes about one minute and a half.

Once downloaded, it is very convenient to **unblock the file from Windows File Explorer** by clicking on it with the right mouse button and choosing the "Properties" option, as shown in the illustration.

This will prevent unnecessary warnings from antivirus software such as Defender.
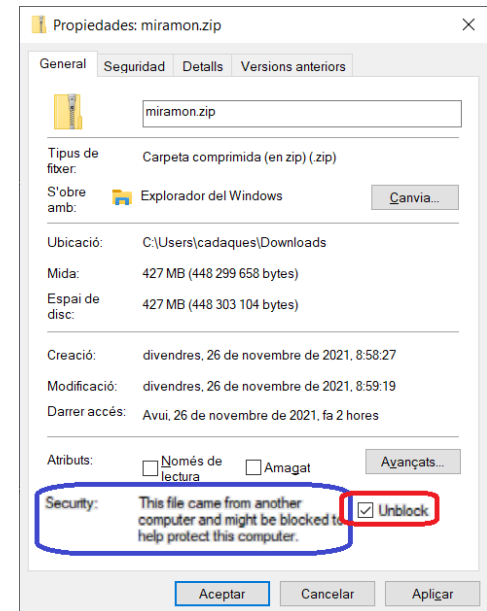

Once downloaded and unblocked, please **unzip the file** (right-click "*Extract to*" on most current operating systems) and **the process will output two files**:

• A very large one, that contains the program itself **(MiraMon.mmz)**
• The **Inst_MM10.exe** setup. This small program is the one that must be run to start the installation

(Note: In some operating systems and configurations, the user may not have enough privileges by default. In this case, you must execute the setup program by right-clicking on the file and selecting "Run as Administrator".)
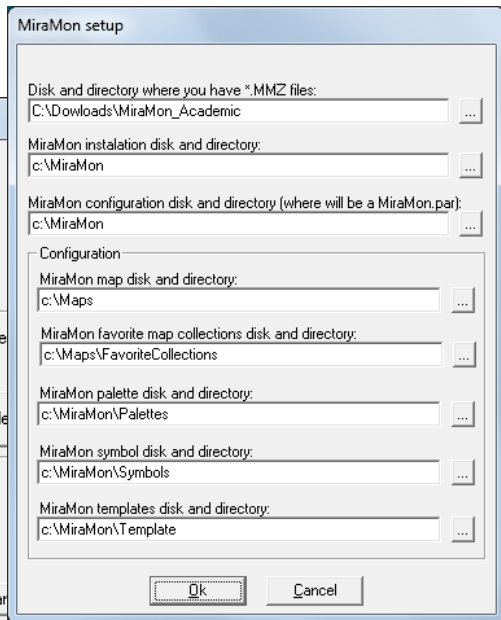

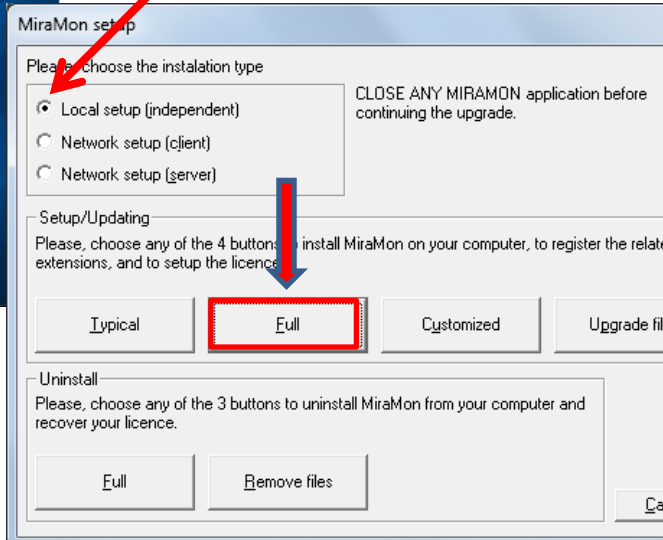

Chose language and **accept the default options**. You will see dialog boxes about:

- Folders to be created (suggested: yes to all)
- File associations (accept the default options unless you know some specific format you don't want to link to MiraMon). Linking IMG to MiraMon is strongly recommend.

If you have any questions, you can write to:
**suport@miramon.uab.cat**
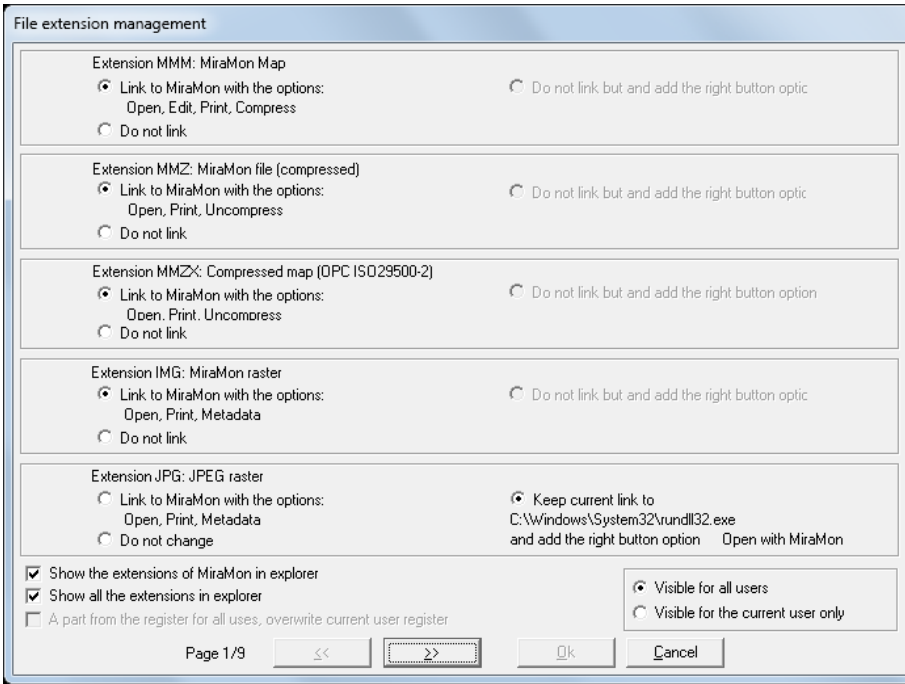

We always appreciate you registration ☺

Please visit https://forms.office.com/e/QDmcnjjY9V

Through your registration, in the future we can send you relevant news about program features, links to materials, information about events, etc. The frequency of emails will be low, and you can always unsubscribe. Thank you very much for considering it.

------------------

Installing Favorite Collections

- Once you open MiraMon, you will see links to **Favorite Collections** (FC) on the left of the first dialog box. Installing **FC** prepares a set of quick links to typical layers and geoservices (DEM, administrative boundaries, etc).

- If you are a person (teacher, student) wishing to prepare a **set of specific resources** (a set of orthophotos and vegetation maps of your area, etc) with visual and fast access to them (instead of having to browse in you hard disk, network resources [UNC], etc) it is **not difficult to create your own FC**. This may facilitate your lessons or work. If interested, write to contacte@miramon.uab.cat to receive a technical document about how to do this.

- On next slides there are directions about how to install some of the FC already available from the MiraMon web site.

MiraMon: Choose a collection and one or more of its layers, if desired, before continuing

Italy
- Typical maps from Italy (UTM-33N WGS84, 163Mb*, 28/05/2024)
- Typical maps from Italy + DEM 25 m (UTM-33N WGS84, 1841Mb*, 28/05/2024)

Portugal
- Typical maps from Portugal (Gauss-Krüger ETRS89, 521Mb*, 28/05/2024)

Switzerland
- Typical maps from Switzerland (Mercator Obliqua (Rosenmund 1903), 20Mb*, 28/05/2024)
- Typical maps from Switzerland + DEM 25 m (Mercator Obliqua (Rosenmund 1903), 469Mb*, 28/05/2024)

The Netherlands
- Typical maps from The Netherlands (Azimutal Equivalent Lambert ETRS89, 193Mb*, 28/05/2024)

World
- Typical maps of the World (long-lat WGS84, 256Mb*, 28/05/2024)
- Typical maps of the World + detailed boundaries (long-lat WGS84, 1174Mb*, 28/05/2024)

Download and install your favorite collections

We suggest to install at least the FC named **World** (Mon.mmz).

Clicking on the different collections will download the FC that will be installed in FC folder, typically: ***C:\Maps\FavoriteCollections***
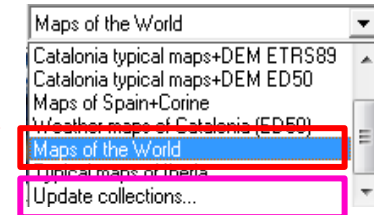

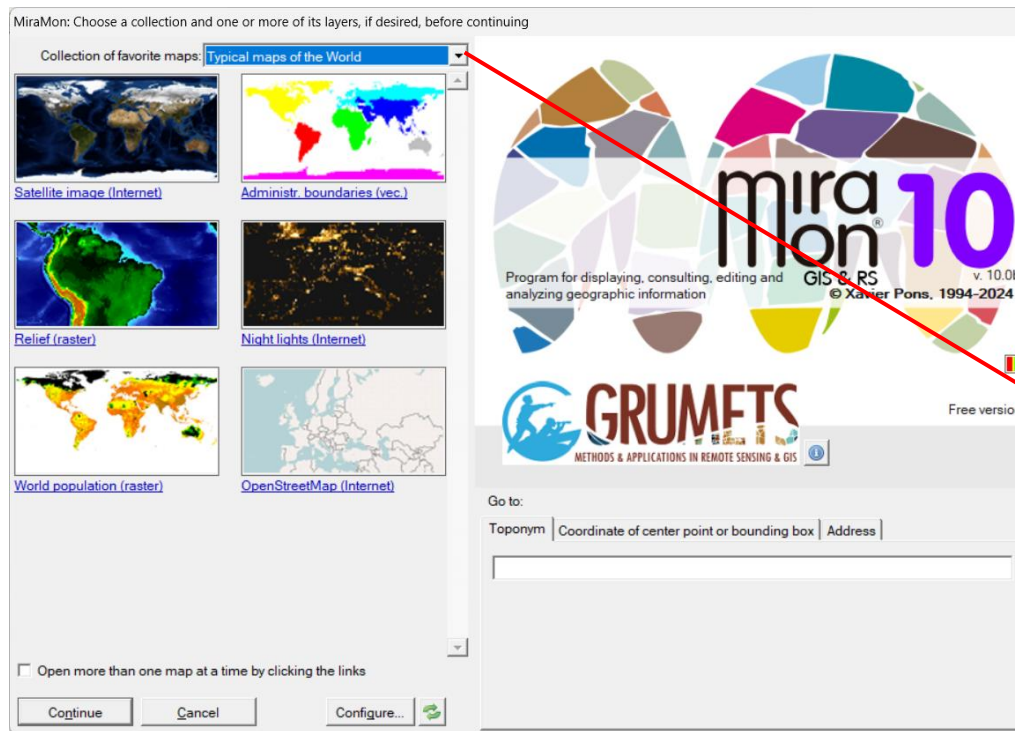

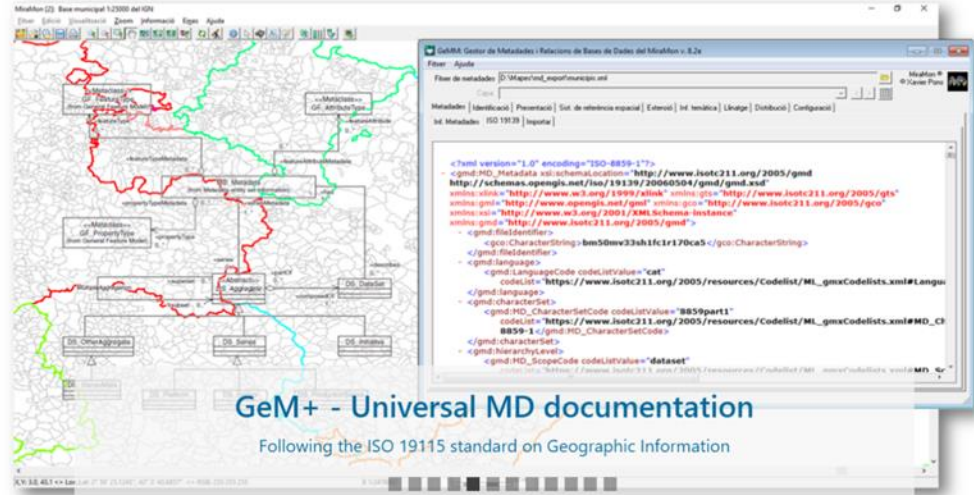

When opening a new MiraMon session, the **installed Favorite Collections** appear.

Many collections have built-in **toponyms** (+50 000 per collection) that allow you to search by place name.

You can download new FC at any time, or you can create your own, as we have indicated.

Remember that if you have any questions, you can write to **suport@miramon.uab.cat**

More information, downloads, courses, news, etc, on our **website**:
